JUNZHEN TSE

Senior Java Full Stack Engineer

Singapore | +65 8068 6659 | victorjunzhen@gmail.com | Singapore Permanent Resident

PROFESSIONAL SUMMARY

Senior software engineer with 8+ years of experience building Java applications and web interfaces for enterprise and Singapore digital platforms. Current work supports a Visa project through Wipro. Strong in Spring Boot microservices, REST APIs, React/Redux, SQL, service integration, security remediation, and production troubleshooting.

TECHNICAL SKILLS

Backend: Java 8-21, Spring Boot, Spring MVC, JPA/Hibernate, microservices, REST APIs, service integration

Frontend: React, Redux, Angular, TypeScript, JavaScript

Data and delivery: Oracle, MSSQL, MySQL, SQL tuning, Docker, Git, Jenkins, CI/CD, Maven, Gradle

Engineering: integration testing, idempotency, validation, secure coding, incident investigation

PROFESSIONAL EXPERIENCE

Senior Java Full Stack Engineer

Wipro | Visa project | Singapore | Dec 2025 - Present

- Build Spring Boot services and React/Redux features for a financial services testing platform that brings workflows from multiple systems into one experience.
- Design REST APIs and service integrations with request validation, idempotent processing, database changes, consistent errors, and integration tests.
- Work with product, QA, and engineering teams on solution design, delivery, defect investigation, and deployment readiness; improve reusable UI components and secure input handling.

Technology: Java, Spring Boot, REST, React, Redux, SQL, Docker, Postman, Git

Senior Product Engineer

SISTIC | Singapore | Feb 2023 - Nov 2025

- Delivered Java and Spring Boot services and REST APIs for customer facing digital products, with an emphasis on modular design and maintainability.
- Investigated production incidents through Splunk, logs, and metrics; resolved defects and added regression coverage.
- Tuned SQL queries and JPA/Hibernate access patterns, including N+1 queries, fetch strategies, and indexing; addressed XSS and VAPT findings through validation and output encoding.

Technology: Java, Spring Boot, JPA/Hibernate, Oracle, Splunk, React, jQuery

PROFESSIONAL EXPERIENCE

Senior Software Engineer

NCS | Singapore | Sep 2022 - Feb 2023

- Built and maintained Spring Boot services and Angular/TypeScript interfaces, defining REST contracts and integration tests for end to end delivery.
- Supported UAT, system testing, production rollout, defect triage, and technical documentation with cross functional stakeholders.

Technology: Java, Spring Boot, JPA/Hibernate, Angular, TypeScript, MSSQL, CI/CD

Senior Software Engineer | promoted from Software Engineer

CrimsonLogic | Singapore | Jun 2019 - Sep 2022

- Developed Spring Boot REST services and React/Redux components for high traffic digital modules, translating product requirements into production features.
- Implemented payment and third party integrations, including Stripe, with exception handling, transaction traceability, and audit logging.
- Delivered across backend, frontend, database, testing, and deployment workflows using Java, JPA/Hibernate, MSSQL, and MySQL.

Technology: Java, Spring Boot, Spring MVC, JPA/Hibernate, React, Redux, MSSQL, MySQL

iOS Developer

Larvata | Taiwan | Mar 2018 - Mar 2019

- Developed an iOS application in Swift and integrated it with backend APIs.
- Automated mobile build and release workflows with Fastlane, Ruby, and Shell.

Technology: Swift, Fastlane, Ruby, Shell, CI/CD

CERTIFICATION

Oracle Certified Professional, Java SE 11 Developer

EDUCATION

B.Sc. in Computer Science | National Taipei University of Technology, Taiwan | 2018

LANGUAGES

English and Mandarin
